

NUMBER SYSTEM (contd...)

9's and 10's complement:-

- Subtraction of decimal no. can be obtained by the 9's and 10's complement methods ~~similar~~
- The 9's complement of decimal no. obtained by subtracting each digit of that decimal no. from 9.
- 10's complement \rightarrow adding 1 to its 9's comp.

e.g.:- 9's complement :-

$$\begin{array}{r} \underline{3465} \\ - 9999 \\ \hline 6534 \end{array}$$

↑
9's complement of 3465

WEDNESDAY • APRIL

2019 - MARCH

S	M	T	W	T	F	S
31						
1	2	3	4	5	6	7
8	9	10	11	12	13	14
15	16	17	18	19	20	21
22	23	24	25	26	27	28
29	30	31				

10's complement
4069

✓

$$\begin{array}{r}
 9999 \\
 - 4069 \\
 \hline
 5930 \leftarrow 9\text{'s comp. of } 4069
 \end{array}$$

$$\begin{array}{r}
 + 1 \\
 \hline
 5931 \leftarrow 10\text{'s comp. of } 4069
 \end{array}$$

✓ 1056 . 074

$$\begin{array}{r}
 9999. 999 \\
 - 1056. 074 \\
 \hline
 8943. 925 \\
 + 1 \\
 \hline
 8943. 926
 \end{array}$$

9's complement Method of subtraction:-

- ↳ Obtain The 9's complement of the subtrahend and add it to the minuend.
- ↳ If there is a carry, it indicates the answer is positive. Add the carry to the LSD of the result to get the answer. This is called end around carry.
- ↳ If there is no carry, the ans is -ve. and the intermediate result is its 9's complement. Take the 9's complement of this result & place a -ve sign in front to get the ans.

eg:-

$$\begin{array}{r} 745.81 \\ - 436.62 \\ \hline \end{array} \Rightarrow + \begin{array}{r} 745.81 \\ 563.37 \\ \hline \end{array} \quad (9's \text{ comple. of } 436.62)$$

$\textcircled{1} \ 309.18 \quad (\text{Intermediate result})$

$\swarrow + 1$

$\underline{\underline{309.19}} \quad (\text{Ans.})$

Carry \rightarrow +ve ans.

$$\therefore \text{Ans.} : + \underline{309.19}$$

$$\begin{array}{r} 436.12 \\ - 745.81 \\ \hline \end{array} \Rightarrow + \begin{array}{r} 436.62 \\ 254.18 \\ \hline \end{array} \quad (9's \text{ comple. of } 745.81)$$

$\underline{\underline{690.80}}$ \downarrow $(\text{Intermediate result, no carry})$

9's complement is 309.19

$$\therefore \text{Ans.} : - \underline{309.19}$$

21 22 23 24 25 26
27 28 29 30 31

10's complement method of Subtraction:-

- ↳ Obtain 10's complement of the subtrahend & add it to the minuend.
- If carry, ignore
- If carry, ans is +ve; the result obtained itself is the ans.
- If no carry, ans is -ve, the result obtained is its 10's complement.

MONDAY • APRIL

17 18 19 20 21 22
24 25 26 27 28 29

Representation of Signed Nos:-

① Signed magnitude form.

② Complement form [$\rightarrow 1's$
 $\rightarrow 2's$]

7 \rightarrow 111

+7 or -7 \rightarrow ?
'+' \rightarrow 0
'-' \rightarrow 1.

Signed Magnitude form :-

Syntax :- [Sign Bit | Actual Binary]

eg: +7 [0 | 111]

-7 [1 | 111]

Complement Form :-

1's complement.

2's complement.

→ Complementing each & every digit of
binary decimal no.

$$9 \rightarrow 1001$$

↓ 1's comp.

$$0110$$

→ Adding 1 to 1's complement.

$$9 \rightarrow 1000$$

0110 (1's complement)

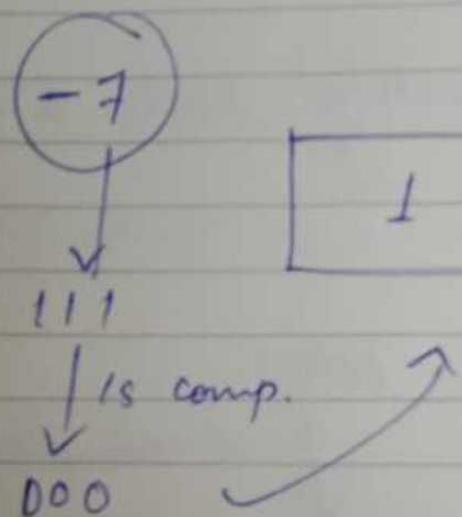

$$+ 1$$

$$0111 \text{ (2's complement)}$$

1's complement Representation of signed no:-

Syntax:-

Sign bit	1's complement of actual binary
----------	------------------------------------

2's comp.
Representation Syntax:-

Sign bit	2's complement of actual binary
----------	------------------------------------

$$\begin{array}{l} \text{Q1 } \frac{-7}{\rightarrow 111} \rightarrow \\ \text{1's } \rightarrow 000 \\ \text{2's } \rightarrow +1 \\ \hline 001 \end{array}$$

1	001
---	-----

2's complement Subtraction:-

- ↳ Add 2's complement of the subtrahend to the minuend.
- ↳ If there is carry out, ignore it.
- ↳ Look at sign bit, i.e MSB of the sum term, If MSB is '0' result is +ve & if it is ~~'0'~~ result is -ve and is in its 2's complement form.
- ↳ Take its 2's complement to find its magnitude in binary.

Ex:- Subtract 14 from 46 using
8 bit 2's complement arithmetic.

$$\begin{array}{r} +14 \\ \hline 0000\ 1110 \\ 1111\ 0010 \end{array}$$

Ex:- $48 - 28$

$$48 + (-28)$$

2's complement of 28

$$48 \rightarrow 110000$$

$$28 \rightarrow 011100$$

↓ , ,

$$1's\ Comp \rightarrow 100011$$

+1

$$\rightarrow \overline{100100}$$

$$+110000$$

① 010100
